## and Prospects--Furnaces and

## Utah Interests on Irish Mountain

High-Grade Silver Ores and Copper-Bearing Ledges That Promise Another Big Camp.

Arrivals from the Irish mountain region, out of Hiko, Nev., continue to emphasize the importance of recent disclosures, and to certify to merits of the amp, distant about fifty miles west of Callente. Joseph Bush, the expert mining man, who was among the first of the colony from Utah to embrace its offerings, came in from the camp yesterday and is now, with prominent Salt Lake mining men, preparing to organize for systematic development. In the group acquired by him is occurring not group acquired by him is occurring not a little ore running high in silver, with not a little lead, at this time, and that it will, with intelligent endeavor, respond to all that is expected of it he has no doubt. In the city at present is Manager Berkey of the Pahranagat group of mines owned and operated by the Timplute Mining company, and which has been the most sensational of the camp's performers. In addition to ores that have already been forwarded to the smelters he has 2400 sacks of high-grade rock now at the surface which will be sent out in a short time.

The camp, says Mr. Bush, is undoubtedly one of many resources. In addition to the high-grade silver ores of which it is productive, there are ledges in which copper and gold preponderate and that promise to become as productive as the neighboring ones. He will return to camp as soon as the organization of his company has been perfected.

Already the Sait Lake investor is quite prominently represented on Irish mountain, while the reports from it have been uniformly favorable. The country was recently examined by George Gunn, field superintendent of the American Smelting and Refining company, at the solicitation of wealthy Utsh interests, and his findings are said by those by whom access has been had to them to be most encouraging. a little ore running high in silver, with

#### BROKE INTO CAVE.

#### Ten Feet of Ore Unexpectedly Exposed in the California.

Advices from the foreman of the California company's properties out of Park City indicate a most important, if not a sensational, disclosure in a cave which has just been broken into through a raise from the intermediate level, said Judge W. I Snyder yesterday, and while the extent of its wealth has not yet been determined, there is now exposed within it from ten to twelve feet of ore in which eccur not a little galena as well as a carbonate of lead. This chamber, which is from thirty to forty feet in height, occurs at a point about 20 feet below the surface, as near as can be estimated by Manager Snyder, and that the ore continues through a space indefinite, the management is prepared to believe Judge Snyder will leave for camp on Wednesday to make an examination of the property, and proposes to start the concentrator just as soon as ores with which to supply it shall justify. At present ores of erty, and proposes to start the concentra-tor just as soon as ores with which to supply it shall justify. At present ores of good milling quality are exposed in a number of places in the mine, associated with them some of shipping quality, and while the undertaking has experienced many ups and downs, the management has by no means lost confidence in its ultimate productiveness. On the contrary, plans are now being made to give it an-other opportunity to assert its resources before the close of the season.

## EUREKA HILL LEASES.

### Men Working on Tribute Doing Well at Old Bonanzs.

The Eureka Reporter, in its digest of the week at Tintic, says. Seventeen leasers are at work in the property of the Eureka-Hill and are doing exceeding-ly well. Messrs John Temby, Sweigert, Barret, Miller and Anderson have taken out twelve tens of good ere each since starting work and shipments will soon begin.

starting work and simplents will soon begin.

Edward W. Nelson and Alfred Nelson have quit claimed to the Greeley Geld Mining company, for a stated consideration of \$1, the following mining claims in North Tintic mining district. The Donald C., Herbert E. and Gold King.

The new strike in the Carlsa is improving with every shift. Each hour's developments add to the importance of the strike, and the new ore hod, seems to be a permanent one. Twelve tons of ore were taken from the raise on the strike Monday night. This would indicate that the ore hody is a large one. If the strike holds out, an everything indicates that it will, the Carlsa should soon be one of the largest producers of this district.

## PREPARING FOR WAR.

#### Experts for Senator Clark to Arriva From Montana

With a corps of experts, scheduled to arrive from Montana the present week, counsel for the defendant in the suit which was recently begun by Thomas Keely of Chicago against Senator Clark and the Ophir Hill Mining company, by whom the latter is controlled, will begin to organize for war, it was said during the day that the contentions of the defendant will be that as the possessor, allegedly, of the apex, it was justified in the extraction of ores for which it is now asked by the plaintiff to step up and set tie, and along the lines of extra-lateral right the issue between the levinthans will be contested. The battle promises to be one of the most interesting that has been introduced into the courts of the West, and to partake not a little of those that have characterized hostilities in Montana. The atterneys for the defendant consists of Messts, Pierce, Critchlow and Barrette.

## ORE AND BULLION.

### Reported Settlements Not Reflected in the Week's Returns.

The week is the ore and buillon market closed on settlements amounting to \$237.606, these figures compared with \$457.500 for the previous one and as an exhibit provokingly discordant with the record of shipments to which the record at the leading stations certifies, or the outgoing buillon from the furnaces would indicate. The day closed on settlements amounting to \$72.600, McCornick & Co. making the following returns: Buillon, \$25.500; gold, silver, lead and copper ores, \$27.100. In the metal market silver ruled at £5% cents an ounce, lead at \$33.5694.50 per hundred pounds, and easting copper at 14% cents a pound.

## Salt Laker at Lida.

Salt Laker at Lida.

J. W. Langley, late of Salt Lake City, who purchased the High-for-Luck property a short time ago, came out Wednesday and apent the week at the mine, says the Enterprise of Lida, Nev. Stoping operations are underway, and the company will ship a car of rich rock in a short time that will put a nice chunk of money in the treasury. The High-for-Luck is a neighbor of the Golden Charlot mine on Blue Dick mountain, from which several tons of thousand-dollar rock were marketed recently from a surface hole less than ten feet deep.

Bears Generally in the Ascendant and Conditions Weak.

The week on the mining exchange closed on the transfer of 216,365 shares of stock, for which 344,196,35 was shelled out the day on the sale of 14,709 shares, for 3677,75, and with the traders generally betraying evidence of ill usuge. At no period in the history of the pit, indeed, has the condition within its brazen environments been so utterly subversive of a condition that prevails throughout the diggings, the earning capacity of the lutter exercising, apparently, no influence whatever upon the status of the former. Everything was down at the close, this in the face of a condition which is crying veciferously for additional fornaces with which to meet the requirements of an output that is hourly increasing. Even Boston Con., to which the faith of so many is cemented and which is forwarding 200 tons daily to the smelters while crystalizing its plans for a milli of tremendous capacity, experienced some trouble in maintaining its position, while Utah Copper, notting its owners over 21000 daily at a plant which was intended to do no more than verify results derived from an experimental plant, was permitted to go over the counter at the eleventh hour at 312. The cluster from Park City, out of which camp over \$200,000 is coming in dividends monthly, was weak throughout, as was that from Thitie, with its huge tonnages of wealth, nor were the exceptions such as to justify any bragging whatever.

At the close Carisa had flattened out to 20 cents and New York to G cents, while Shield reached 21 cents only after an effort, with Yankee Con. marked down to 294, cents, while 1200 was being unloaded. Uncle Sam, with an important development possible at any volley of shots, sold at 31 cents, and May Day at 7 cents, while Tetro found itself stargering around 14½ the day closing on the following market: The week on the mining exchange closed on the transfer of 216,306 shares of

# The Utah Copper and Boston Con.

Preliminary Work on the Two Huge Milling Plants Now Drawing to a Close.

With the plans upon which its engieers have been employed for many weeks practically completed, the breaking of ground for the Utah Copper com pany's big mill on the margins of Great Salt lake will begin the present month said Manager D. C. Jackling last night. The only agent that can derange this The only agent that can derange this plan is the railway, and from that source definite assurance that it will be ready for its part in the huge undertaking is expected at any hour. For its consummation along the most aggressive lines, financial provision has all been made, the placing of contracts for the avalanche of material to be knitted into the stupendous structure to follow as soon as the plans to which the minute details were being added during the day are placed in the hands of the management. The first unit with which construction will begin, said Manager Jackling, will have a nominal capacity of 2500 tons, this to be followed by a second of corresponding proportions as soon as the first shall have cut its teeth and settled down to the normal, and that with the twain Superintendent Janney will find it possible to reduce 600 tons daily, is not at all unlikely in the light of achievements recorded by him in Bingham canyon.

For the inauguration of active work on the Boston Consolidated company's mill on the margins of Utah lake, work on the plans is also being dispatched. Engineer Henderson, under whose supervision the survey for the railway between the camp and site for the mill, is to be conducted, is now in the field and with his corps will rush the undertaking, the final estimates on cost of construction to be submitted at the earliest hour possible, grading to follow.

MR. RICE RETURNS. plan is the railway, and from that source

### MR. RICE RETURNS.

## Season in the East Prosperous-

Friendly Feeling for the West. After an absence of two months at Riceberg, his old home out of Montreal, Cannada, Mr. W. V. Rice returned to his offices in this city yesterday, Mrs. Rice remaining at their country residence in the regions of the North. Of the East, said Mr. Rice, the country appears at its best, with every indication that the harvest will be one of the most generous in its Mir. Rice, the country appears at its best, with every indication that the harvest will be one of the most generous in its history. While in New York he listened to a greater number of inquiries upon Utah and its mining interests than on any previous visit. At present its people are also aroused to the wonderfully favorable conditions existing in southwestern Nevada, said Mr. Rice, and a number of prominent investors have dispatched their representatives into that section with several to follow, the present week.

Referring to interests in Goldfield and Builfrog with which he is associated, Mr. Rice said that in discussing the columns of a Philadelphia paper some days ago he was distressed and humiliated at the prominence with which his name had been used in an advertisement relating to the Gibraltar Mines yndicate, the details of incorporation and the organization of which were all planned and carried out by associate interests after his departure. which were all planned and carried out by associate interests after his denarture from Utah, while the printed matter was sent out without his knowledge or without consultation with him. Mr. Rice does not, however, by any means, depreciate the Gibraitar Mines Syndicate company's properties as a mining venture. On the contrary, he believes its properties among the most meritorious in that extraordinary region of gold. He believes the undertaking, uniformly commended by those who have inquired into it, will be a winner. Mr. Rice departs early the present week for Idaho and returning will leave for Goldfield and Bullfrog to inquire into his interests.

## ASTED TO A FILL

#### Pretty Compliment to The Tribune's Representative in Nevada Camps.

D. H. Peery, banker and broker, heavy owner in the Peery Montgomery Moun-tain Mining company, and W. H. Clark of the Dixie and the Gibraltar Mines Syn-dicate, dined a number of their friends at the Oxford cafe last evening in honor of Horace Dunbar, representative of Tho Salt Lake Tribune, who departs for that city today, says the Sun of Goldfield, Nev. The banquet board was an elaborately Salt Lake Tribune.

City today, says the Sun of Goldfield, NevThe banquet board was an elaborately
supplied one from bouillon to Mumm's
wine. The party convened at 7 o'clock,
and continued the good cheer well toward
indight. Mr. Dunbar has made innumerable friends during his stay in this and
the Bullfrog camp, and his departure is
cause for sincere regret among his acquaintances. The wish was expressed last
evening that he would soon return to this

## SHOSHONE SHIPMENTS.

#### Sensational Performer to Sell Its Output at Reno Sampler.

The management of the Shoshone mines at Rhyolite, Nev., having decided to forward its output in future through the sampler at Reno, Nev. the ores from that source which have been so prominently exploited in the past as an example of Nevada's wealth, will undoubtedly lose that personality in transit, and to that extent the camp deprived of the prestige so valuable to it. The company, settling for its ores at Reno, the purchaser there will undoubtedly blend the higher grades of the Shoshone with the ores of less value from other sources, thus economizing on the cost of transportation. However, it cannot detract from the sensational earnings of which the Shoshone has shown itself capable. The management of the Shoshone mine

## AT THE ONTARIO.

#### Long Drain Tunnel Now Opened to 9000-Foot Station.

The reopening of the Ontario's drain turnel at Park City has reached the 9000, foot station with the next stubborn of-struction, as far as it can be accurately anticipated, to be encountered around that anticipated, to be endountered around that 10,000 feet distant from its mouth. To aggravate the situation was the bad air which has been making, but this, it is thought, will have soon been overcome. The waters are now around the 1200-foot level, but no particular injury is yet feered.

## Red Elephant Ores.

Another consignment of ore, from which the company is deriving about \$100 per ton net, is now on its way from the Red Elephant at Halley, Ida, this to be followed by two carloads of concentrates that will not about \$50 per ton. In a cross-cut from the lower tunnel connection has been made with the ledge, and upon this the management is now drifting to intercept the ore-bearing channels at great depth. The future of the Red Elephant appears to be quite positively assured.

Utah in Montana. A letter from Helena, Mont, says Butte and Utah capitalists are negotiating the purchase of the Currie group of locations near Boulder, that State. Owner Rothfus demands \$1,000,000 for the claims, which are said to be very promising, and it is expected the deal will shortly be com-

# Montana to Pay \$100,000 Dividend

Directors Decide on Big Distribution at the Adjourned Session

Special to The Tribune. RENO, Nev., July 1.-At the adjourned eeting of directors of the Montana-Toopah Mining company, held in Reno, nopah Mining company, heid in Reno, Nev., during the day and at which all members of the board, with the exception of Charles E. Morris of Butte, were present, a dividend of \$100,000 was posted, the distribution to take place August 1. The final decision of the board was not without opposition, as there were those present who advocated quite fervidity the passing of it until a later day in the year. Salt Lake interests in the company were represented by Hon. William H. Dickson, the eminent mining lawyer, and Adrian C. Ellis, Jr., a member of his firm. Conditions at the mine indicate that the dividend will be repeated quarterly, and that the output will be materially increased in short time.

## Water for Mills in Nevada Camps

Second-Class Ores to Be Made to Disgorge Their Contents, Says an Experienced Mining Man.

It is not necessary to exaggerate the wealth with which nature has endowed the camps of Rhyolite, Bullfrog and Beatty to commend them to the expert mining man and investor as among the greatest possibilities that have over been discovered in the mineral bearing regions of the West, said Mr. E. R. Kaspar yesterday. While developments there have been confined to a few months and to less than a full working season, said the visitor, they have been characterized by resuits as sensational and apparently as
permanent as any that have been recorded in the West. Closely united, it
is difficult to make a distinction between
this gold-bearing triad. Each has its
resources apparently as pronounced and
as enduring as the other, and each will
undoubtedly attain prominence the present year. While the Shoshone, with its
almost incredible values, has been the
sensation of the hour, there is no doubt
that the story of this phenomenal discovery will be reproduced. Dismissing
the high grade ores, however, and confining the argument to that which most
find an outlet under present conditions
through the stamps and leaching tonks,
the region must become one of the most
productive of any in the system of goldbearing ones. For the economic reduction
of ores, the Armagosa river afforcis all
the water that shall be required, no matter what the volume of one that shall be
developed, and while Beatty at this time
is commended as the more favorable site
for the projected plant, in that it is the
nearer the river, it is possible to conduct
this water to the neighboring camps and
at little additional expense and to achieve
as much at these.

Mr. Kaspar, who has been a resident than a full working season, said the visi-

at little additional expense and to achieve as much at these.

Mr. Kaspar, who has been a resident of the digglings throughout the West for many years, is very enthusiastic over many of the properties with which Salt Lake mining men have identified themselves, and is firmly of the belief that much of the wealth of these camps will find its way into this State. Of the properties being developed by the Peery company, he says there is no doubt whatever that they are fissured by the same great ledge exposed on the Shoshone, while the properties being operated by Judge Sherman should place him among the bonanza kings of the West. In the Gibraltar, Meers, Farrell, Rice and others have acquired what affords assurance of becoming one of the most productive in the country, while a number of others from this State have been equally as fortunate in their acquisitions. Mr. Kaspar will remain ten days in town, after which he will return to devote his time to the development of personal interests there.

## SALE OF OVERLAND.

#### Event to Take Place in Toole County on Saturday Next.

on Saturday Next.

To be present at the receiver's sale of mines and mill belonging to the Overland Mining company, located at Sunshine, Camp Floyd mining district, and which event is scheduled to take place on Saturday next there will arrive from Boston during the week Denman Blanchard and others representing the larger claims. Immediately this is consummated, it is understood that plans will be devised for the further operation of the proporties and diligent effort made to place them upon a basis as productive at least as were they when the cave-in occurred, and Manager Clarko and his forces were driven out. The demonstrations made by Mr. Clarke afford assurances quito conclusive that under economic conditions the gold-bearing ores of which the Overland is capable can be made to afford a margin. Per ton, this margin is a small one, but with facilities for the reduction of large volumes, there is no doubt in his mind that the proposition can be made a profitable one. So confident of it is he, indeed, that he has made the company a most liberal proposition and with his vervices any doubt concerning it in this locality would certainly be reduced to the minimum.

## ANOTHER NEW ESTABLISHMENT

## FOR SALT LAKE CITY.

The Salt Lake Pressed Stone Co. Have just constructed an office building and factory on Pierpont st., back of the Dooly block, for the manufacture of concrete building blocks, under the Miracle patents. These blocks contain a double air space staggered in the arrangement so that when a building is completed it is impossible to pierce the walls without striking an air space; therefore, one is able to plaster directly on the back of the blocks, and assures a frost and moisture proof building. Mr. J. M. Wildey, the manager of this

company, is well and favorably known in Salt Lake and doubtless success is assured, as the material is being used very extensively in the East and cen-tral States, and promises to be the coming building material.

Mr. Wilfley has recently completed his new 12-room residence corner 12th

East and 1st South; the entire build-ing is constructed with these concrete blocks, and presents an elegant appear

Investigation of this new plant is invited and the company is in a position to furnish estimates and make deliveries immediately.

Grand celebration of the national holf-day, July 4, at the Salt Palace. Admission free. 5-mile motor race between Samuelson, Heagren, Eddie Smith at 3 p. m. Admission free. Prizes for largest family; prizes for prettlest baby under 1 year; running matches, baseball games; tug of war, and other sports. Fireworks distributed free to the children all afternoon. Bring your lunches and spend the day with us, Plenty of shade, lawns and tables to accommodate all.

# A Steady Output of Mercur Gold

Developments at the Herschel Premonitory of Another Mill-Con. Mercur and Sacramento.

While the campaign of exploratory work which has characterized the season at the Mercur properties of the Herschel Mining company has not advanced to a point to justify the management in calling for a mill with which to reduce its gold-bearing

mill with which to reduce its gold-bearing ores into gold dollars, said Manager Joseph Smith on his arrival from those diggings yesterday, the results have been most assuring and point unerringly to that end While operations have been with a small force, compared with that employed in former days, a considerable territory has been opened up and conditions at this time in Herschel ground are more favorable to achievements for which it has been persevering than ever before. With the ores to justify it the company will experience no difficulty in providing itself with a plant with which to reduce them.

While the glamour of early days has gone with operations there reduced to three companies, Mercur as a camp of gold continues to add to the nation's supply. At the Sacramento, said Col. Smith, the usual volume of gold-bearing rock is being put through the evanide plant with not a small sum being derived from the mercurial ores, while at the Con. Mercur conditions are more gratifying than have they been since the shareholder was permitted to pack up his portion of a monthly dividend while a plece of gold was being as frequently added to the surplus. Indeed, the big plant continues to make a whole lot of noise by day and night, with everything to indicate a steady production for many years. The camp, indeed, continues to maintain its position on the mage.

### Mining Notes.

An assessment of 3 cents a share has been called for by the Naildriver at Park City When the mining exchange adjourned yes-terday it was until next Wednesday morning. Charles T. Harte came in from Bingham yesterday morning, to return to the tripod again tomorrow

Henry Erum of the Utah Copper company ame in from camp yesterday morning to onfer with Manager Jackling. C. H. Scheu, one of the founders of the com-pany, will leave for the Honerine mines and mill at Stockton this morning.

Gldeon Snyder has returned from Gold mountain, much pleased with conditions at the Annie Laurie and the Apex, of which lat-ter he is the averagery. ter he is the secretary

ter he is the secretary.

Frank Wilson, manager of the Johnnie Mining company, has returned from California, whither he went to examine property in behalf of his organization.

Messra H. G. Moynahan and J. T. McCarthy, who are operating in the gold camps of Nevada, came in from the west vesterday morning to repeat the story of that country's wealth.

Practically all of the larger mines throughout the State suspend operations tonight, that those employed within them may have opportunity to relebrate the Nation's birthday unrestrained.

Crescent Times: P. J. Qualley, a mining expert of Remnierer, Wyo., has been at Nippeno looking the ground over. He has no healtancy in saying that in all his experience he never saw anything equal the prospects of the Crescent district.

State Journal, Reno: James Gorman and a Mr. Rosenthal are the latest to make a big strike in the new Whitehorse district. At a depth of twelve feet they have uncovered eighteen inches of free-milling ore that ussays \$125 in gold to the ton.

Manager Weir of the Alax says that while the change for which he has been driving has not yet been developed, the condition along the route is a very highly mineralized one and that he expects to be able to report an import-ant disclosure at any hour.

ant disclosure at any hour.

William Davey, formerly superintendent of the Yampa mines, Bingham, has arrived from camp, and will remain indefinitely in Zion. It is the intention of Mr. Davey to give his attention to personal interests and those of a large list of clients throughout the country. The return of Willard F. Snyder from Callfornia is scheduled for today. Mr. Snyder has been conducting an examination of the Western Exploration company's interests in Shasia county, and undoubtedly returns with a fund of information affecting its splendid development.

Manneer, D. P. Robling of the Frisco Con-

Manager D P Rohing of the Frisco Con-tact and Lulu Mining companies has returned from his camps in Beaver county, much pleased with the progress of development, and that he will have added two more to the list of producers before the close of the season ap-pears quite well assured.

Hon Newton J. Cairow, the largest indi-vidual shareholder in the Ohio Copper com-pany of Bingham came in from the East dur-ing the afternoon and will remain ten days or more. At the mine there awaits him a number of surprises, while the mill will show him a new record for June.

Goldfield Sun: I. G. Southey of Leadville and San Juan, Colo. returned to Goldfield yesterday from the new Quartz Mountain district in southern Nye county, which is about fifty miles southeast of Goldfield. He reports great activity, and says that conditions are combining to bring the section to the front in rapid strides.

#### Buy It Now. Now is the time to buy Chamberlain's

Colic, Cholera and Diarrhoea Remedy. It is certain to be needed sooner or later and when that time comes you will need it badly-you will need it quickly. Buy it now. It may save life, For sale by all leading druggists, Christensen's enlarged orchestra Salt-

## KIND PUBLIC.

Mr. Anderson, the well-known blind man, who was in the great explosion at Price some years ago, and now a news-boy in this city, is trying his utmost to make a living for his wife and family by selling papers, but it seems at pres-ent to be a complete failure on account of the rumors circulating among the public regarding his wealth, which has absolutely no foundation. His object is to get enough to start his wife (who has very poor health) in a little business in a town out of this county.

He is usually at the "Busy Corner"-2nd So, and Main-except in the heat of the afternoon-near the old clock

Kindly remember him to this end when you want a paper.

Bell 'phone 3000. Ind. 'phone 2355. EMPIRE DAIRY

H. N. STANDISH, Manager 125 East Second South street.
